## TO THE TRADE

### This List Cancels All Previous Lists

**Packing.** Net F. O. B. our shipping points. Packing charges are extra. We make no charge for packing car lot orders in bulk.

#### Notice!

We anticipate that there will be many shortages before the Planting Season is over. All prices in this list are subject to change without notice. All quotations are made for immediate acceptance and with the understanding that all orders placed by us with our shippers are placed subject to shipper having stock on hand at the time your order is received. We advise you to place all orders early.

#### PRICES ARE SUBJECT TO CHANGE WITHOUT NOTICE

Orders are accepted on condition that they shall be void should stock become injured by frost or other causes beyond our control. We cannot be responsible for loss caused by damage or delay in transit. If such damage occurs, it must be reported and entered immediately with your local agent of the transportation company.

→ See Notice Inside Back Cover ←

CLAIMS for error or shortage will be gladly corrected, but we must be notified within TEN DAYS after arrival of the stock. Such claims must be based upon an actual check of material at the time shipment arrives and not after it has been sold or lined out. Positively no claims will be allowed unless we (or the shipper) are notified within 10 days of arrival of the shipment.

**Quantity Discount.** Five to 30 plants furnished at the 10 rate, 30 and up at the 100 rate and 250 at the 1,000 rate.

**Guarantee.** Prices do not include any guarantee of growth whatever.

**Terms.** All accounts are due and payable 30 days from date of invoice. Cash, security, or satisfactory Trade References will be required from unknown parties. Interest at 6% will be charged upon all past due accounts. Cash discounts: 2% 10 days from date of invoice.

Where quantity ordered is of sufficient amount we can arrange for shipment by motor freight at prevailing rates. Our favorable locations make it advantageous for our customers to come with their trucks and take away their purchases.

#### Our Service

We always use the greatest care in placing orders for material where we believe the customer's interests will be best served as regards transportation, etc. Sometimes we receive orders for material of which we are either sold out or do not list. In such cases we fill the order, if possible, from the nearest source of dependable stock. This service, we believe, means much to our customers, especially during the busy planting seasons.

**Halloran Yew (New)**

*TAXUS media*

*HALLORAN STRAIN*

A variety of much promise. We strongly advise that you try a few of these plants. A hardy Yew of fine foliage. As a young plant it is of a broadly upright habit of growth but as an older plant it develops into more of a spreading type with a high, full center. As this variety becomes better known, we anticipate a heavy demand for it.

### Japanese Beetle Inspection

All plants shipped outside the Japanese beetle quarantined area are accompanied with a Japanese beetle certificate. All balled and burlapped plants are shipped from treated soil. We can supply such certificate on all types of deciduous stock. We can supply these Evergreens only with such certification; Arborvitae in variety, Taxus in variety, and Canada Hemlock.

## **BROAD LEAFED EVERGREENS**

## DAPHNE CNEORUM

## For Easter and Mothers' Day Forcing

Florists find Daphne a profitable forcing item. All of our Daphne is the same fine heavy type as here shown, both for forcing in the greenhouses or for garden use. This Daphne we offer is grown by the Adams Nursery and is shipped from and invoiced by that firm. Can be shipped by express at any time during the winter. Our shipper advises that shipments of Daphne handle equally well for forcing if shipped bare root, instead of in Cloverset Pots, where distant shipping point would seem to make this method more desirable. In case you order bare rooted material we suggest you be very careful to pot the stock immediately and allow the plants time to establish themselves in moderately cool temperature. Price for bare rooted plants is 10 cents less than potted plant prices.

### JOIN THE A. A. N.

To all our customers who are members of the American Association of Nurserymen, it is not necessary to call attention to the fine service being rendered by that organization to our entire industry. But to you who are not members, let us say that you are missing a service which is worth many times its cost. You should belong and get this service for your own benefit. We hope that all nurserymen, who have not already done so, will send in their request for an application blank to Richard P. White, Secretary, American Association of Nurserymen, Room 636 Southern Building, Washington 5, D. C. (or if you prefer you may send this request to our office).

### HYBRID BLUEBERRIES

We have a fine supply of this popular item, both in heavy plants potted in paper pots and dormant rooted from the field. We have all grades from liners to large 2-3 ft. plants balled and burlapped. If interested please write us for our list of varieties and prices.

### ROSES

We will have a good assortment of *Hybrid Tea*, *Climbing* and *Polyantha Roses* for shipment from reliable growers. Our Rose shipments have always given satisfaction and this coming season the quality will be exceptionally good. We can supply *both dormant rooted and wrapped Roses*. Will be glad to quote upon your requirements. We will have our usual supply of *Potted Roses for shipment about May 15, 1951*.

### NOTICE

*All agreements and contracts are subject to ability of shipper to obtain the necessary manpower to dig and pack material and to priorities on material and transportation which may limit, restrict or make impossible performance thereunder.*

### TO OUR CUSTOMERS

Our office will be open at all hours of the day and night during the busy shipping season to answer phone calls and receive telegrams. This, together with our very fine mail service in Wallingford, enables us to give you the quickest possible service in getting rush orders placed to our various shipping points.

### Hinsdale Leaf Mold

This fine Leaf Mold is well recommended for Greenhouse, Lawn and Garden use. It is ideal as a soil conditioner, containing 93% organic matter. Acidity 4.7 to 5.7. Specially good for Azaleas, Rhododendrons, Laurel, Blueberries and Evergreens.
